

Change your monitor resolution

Step 1

Click on the Apple logo in the top left corner of your menu bar and select "System Preferences".

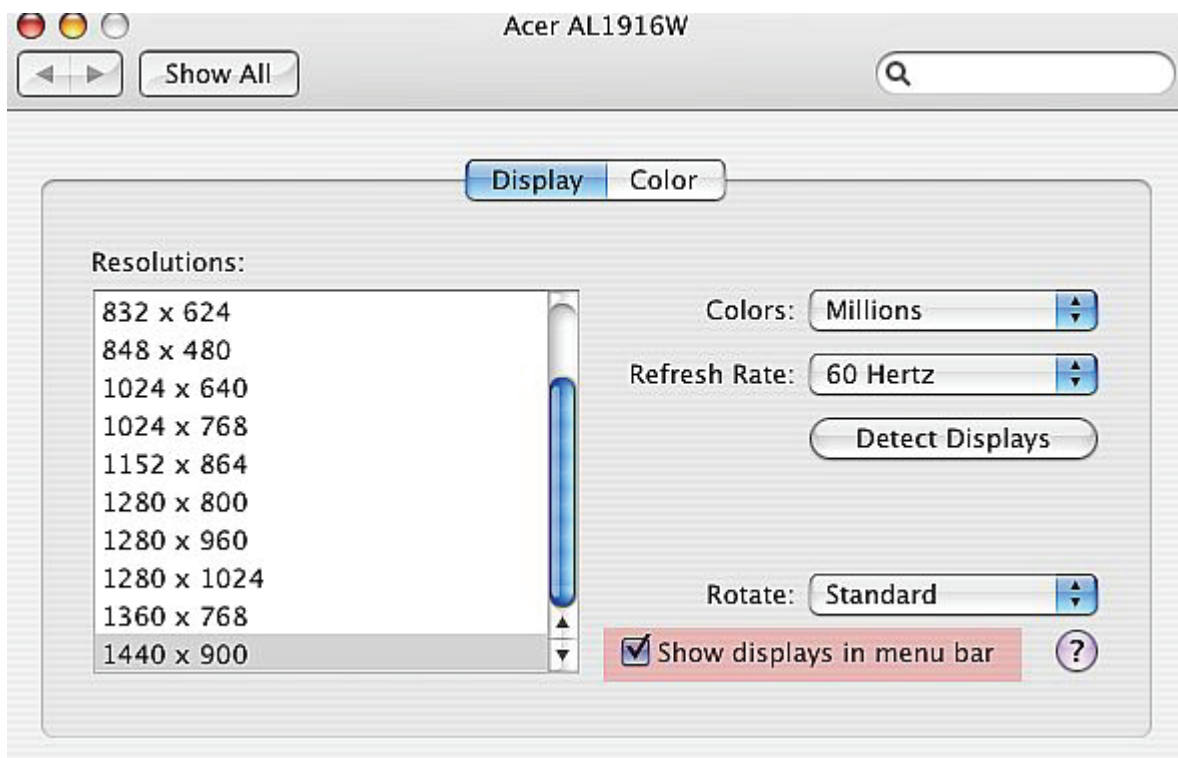

Step 2

Select "Displays"

Step 3

Check the box that says "Show displays in menu bar". This will add a monitor icon to the right side of the menu bar.

Step 4

Locate the monitor icon on the top right of your screen on the menu bar.

Step 5

Click on the Monitor icon. This will bring up a menu with several options.

Step 6

Select your desired screen resolution. OSX will change the display resolution on its own.

Step 7

To quickly switch between resolutions, you can just select one and OSX will change it immediately.

Step 8

You can also access the "Displays Preferences" screen from here without going through the "System Preferences" window.
